System Integrator in Digital Health (SIDH) Initiative

Welcome to the **System Integrator in Digital Health (SIDH)** initiative, a pioneering endeavour aimed at transforming healthcare through the **seamless integration of Electronic Medical Records (EMR)** in hospitals across Tier 2, Tier 3, and semi-urban regions of India. This initiative is driven by the commitment to further the goals of the Ayushman Bharat Digital Mission, led by the National Health Authority (NHA) of India. SIDH offers System Integrators (SIs) a valuable opportunity to contribute significantly to the adoption of digital healthcare solutions.

Program Objectives:

1. Establish a network of System Integrators (SIs) to support and facilitate the implementation of ABDM-enabled Electronic Medical Records (EMR) in hospitals.
2. Foster digital transformation in healthcare by addressing the gap in digital health adoption and fostering partnerships between SIs and healthcare facilities.

Business Support to SIs

EMR Partnership:
Assist SIs in identifying suitable EMR vendors for partnership.

Onboarding & Training:
Provide comprehensive training sessions to equip SIs with the necessary knowledge and skills for navigating the digital health ecosystem.

Marketing & Sales Support:
Drive marketing and sales initiatives in collaboration with EMR providers to actively engage hospitals.

Key Activities

Partnership Development:
Collaborate with approved EMR vendors to deliver tailored solutions to healthcare facilities, ensuring seamless integration and implementation of EMR systems.

Implementation Oversight:
Ensure smooth integration and implementation of EMR solutions within hospital systems to maintain operational efficiency.

Technical Support:
Provide comprehensive assistance to address any post-implementation technical issues or challenges.
